DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23, 26 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,873,855 to Eggers et al. Eggers et al teach a thoracoscopic procedure for revascularizing the myocardium from the outer wall or epicardium (Col. 21, lines 8-10) wherein an electrode array (Fig. 12, #108) is positioned in close proximity to the heart tissue while simultaneously applying voltage (transmitting energy) from power supply (Col. 21, lines 45-48). Clearly, positioning an electrode in this manner would position the electrodes on the epicardial surface. The array includes a plurality of electrodes (Fig. 13, # 108).

Allowable Subject Matter

Claims 29-34 are allowed.

Claims 24, 25 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
